

CONCRETE EMBEDS

**Need QUALITY?
Call METFAB!**

Galvanized, Painted, Black or Stainless

METFAB has the personnel and machines to create any embed you need. We make unusual embeds every day and work with the best contractors in the world to fabricate solutions for custom embed applications. We can finish and deliver these critical parts FAST. We do so every day of the week. See these at other points in this brochure and on our website.

Headed anchor stud assemblies and welded rebar assemblies produced as fast as next day. Galvanized work as fast as second day. **Emergency jobsite deliveries available.**

Embed assemblies from 4 inches to 14 feet. Our bending, shearing, punching, cutting, painting and certified welding facilities are prepared to handle all your requirements. Our galvanizing subcontractor is extremely responsive, and is ISO 9001 registered. Materials in stock include domestic A-706 rebar, headed anchor studs (aka Nelson Studs), deformed bar anchors, carbon and stainless plates, bars, and angles. All material can be sourced US-domestic or NAFTA when required.

We create custom tooling on large volume orders. We are responsive, communicative team players and want to assist you in creating innovative solutions to real life business problems. Please fax us your RFQ today.
