NEW YORK, NEW YORK  
ARCHITECT: RICHARD MAIER & ASSOCIATES

HUMAN GENOME RESEARCH  
HEADQUARTERS  
ROCKVILLE, MARYLAND  
ARCHITECT: DAVIS CARTER SCOTT

**Need QUALITY? Call METFAB!**

**METFAB** has the personnel and machines to execute glass anchoring systems for fenestration, doorways, custom enclosures and the like.

**METFAB** is ready to create custom clips, embeds, tube assemblies, connections, purlins, bridging and spanning hardware to your individual design specifications. **METFAB** provided extensive quantities of custom steel and stainless parts for these recent projects at left.

At **METFAB**, our motto is "value added fabrication". We build exactly to spec, keeping in mind the big picture. Value means performance – delivering on time, as specified, and ready to install. It means helping our customers succeed and flourish. It means providing solutions, not just parts.

**METFAB** crafts from stainless steel, mild steel, and aluminum. Finishes include zinc-rich primer, epoxy and other multi-part paint systems, and hot-dip or electroplate galvanizing. Our experience with architecturally exposed structural steel helps convert an architect's vision into reality.

If your architect can draw it, **METFAB** will build it. Regardless of the raw material, you can be confident that the finished product will be of the highest quality.
