

TRUSS WALL PANELS

***Need QUALITY?
Call METFAB!***

Truss panel wall construction allows off-site fabrication under controlled conditions, quicker erection, better inspection and quality control, and panel-by-panel installation (up to 500 sq. ft. each) as compared with in-place wall construction.

Truss panel options include full weatherproofing via galvanized or stainless pan and caulk; finishes of shop primer, zinc-rich primer, and epoxy top coat; insulation up to six inches thick; aluminum or stainless stone clips; and choice of ultimate cladding (granite, limestone, marble or brick).

*Want a panel to last a hundred years? **METFAB** now crafts **GALVANIZED** trusses!*
